The Socialist Market Economy Must Carry Out the Property Adjustment Policy

[CN] Jiguang Li

Abstract: The adjustment of income distribution to narrow the gap between rich and poor there are limitations. The socialist market economy must carry out the property adjustment policy to cover the insufficiency of the income division adjustment policy. The 17th representative assembly of Chinese communist party offered that we should make the condition let more masses to possess more property income and the thesis indicated the necessary of the property adjustment in market economy, because the precondition to make the property income is the people have to possess the property first. In order to make more people to possess more property income and uphold the socialist economy system major composed by the principle of public property, we should consolidate and develop the public economy and promote the staff and workers of the private companies to hold the stocks and at the same time to limit the capital and charge the inheritance tax as soon as possible.

Key words: property adjustment, public ownership system, the employee's stock holding, limit capital, inheritance tax
